# \*COLORATOR INDICATING FILTERS

FOR SUCTION, PRESSURE AND RETURN LINES

\*MARVELBO-S

\*MARVELBO-R

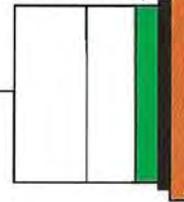

\*MARVEL R2 and R5

\*Trademark MARVEL Engineering Co.

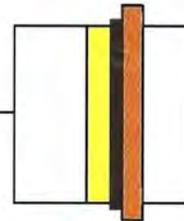

INDICATOR RING

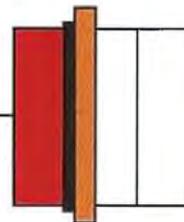

**GREEN SAYS  
"ALL CLEAR"**

Indicator Ring in green band says "filter element is clean".

**YELLOW SAYS  
"CAUTION"**

Ring in yellow band says "filter element is becoming contaminated but still providing full-flow filtration".

**RED SAYS "STOP"**

Ring in red band says "change (or clean) filter element at once or some liquid will bypass clogging element."

For Hydraulic Oils, Coolants, Lubricants • Fire-Resistant Hydraulic Fluid • Synthetic (Phosphate Ester Base) • Aqueous Base (Water Glycol)

Available with \*MARVEL-MAG MAGNETIC SHIELD

- 5 to 150 GPM
- 3 to 20 MICRON PAPER or 10 MICRONS to 20 MESH WIRE CLOTH
- ELBOW TYPE-SUCTION
- LINE TYPE-PRESSURES to 5000 PSI

# MARVEL COLORATOR INDICATING FILTERS

For Suction, Pressure and Return Lines (MarvelMag Magnetic Shield Optional)

Yes—Big Things are continuing to happen at Marvel. Our ceaseless research into new ideas, materials, and methods is producing important advances in filter design, performance, and servicing.

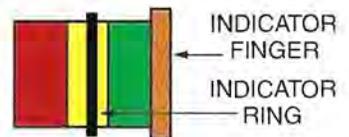

The Marvel "Colorator" Indicating Filters—now fully field tested and proven—are an outstanding example. Here is new, better protection against the solid contaminants that ruin more precision circuit components, waste more dollars in downtime and maintenance than most other factors combined.

These Marvel Filters—as presented in these pages—not only do a superior job of keeping hydraulic and other liquid systems clean, their Colorator Indicator informs you INSTANTLY, CLEARLY, CONSTANTLY about the condition of the replaceable filter element. A positive built-in WARNING SYSTEM that uses the universal language of COLOR to visually pinpoint the danger of a clogging filter element. Thus, it enables you to replace (or clean) the contaminated element BEFORE any dirt damage can result.

The simple, reliable operation of the Colorator Indicator is

explained on the front cover. So thorough is its operation that, even when the hydraulic (or other liquid system) is shut down, the Colorator continues to indicate.

The orange colored finger that moves Indicator Ring goes back to initial position, leaving Ring in color band that shows last condition of filter element.

Another example of improved filtration from Marvel is the new MarvelMag Outer Magnetic Shield that offers unique protection against the harsh, cutting ferric particles that do the most damage to hydraulic systems and components. MarvelMag is available—at customers' option—on all Marvel Colorator Indicating Filters. See back cover for interesting facts on MarvelMag.

Note: On Marvel Colorator Filters equipped with the MarvelMag Magnetic Shield, the Colorator indicates the condition of the magnetic rods as well as the condition of the filter element.

Phase 1 Filters do not have a transparent Colorator Dust Cover.

Phase 2 Filters have a transparent Colorator Dust Cover as shown in this Catalog.

Marvel Engineering Company reserves the option to ship either unless specifically requested otherwise by the customer.

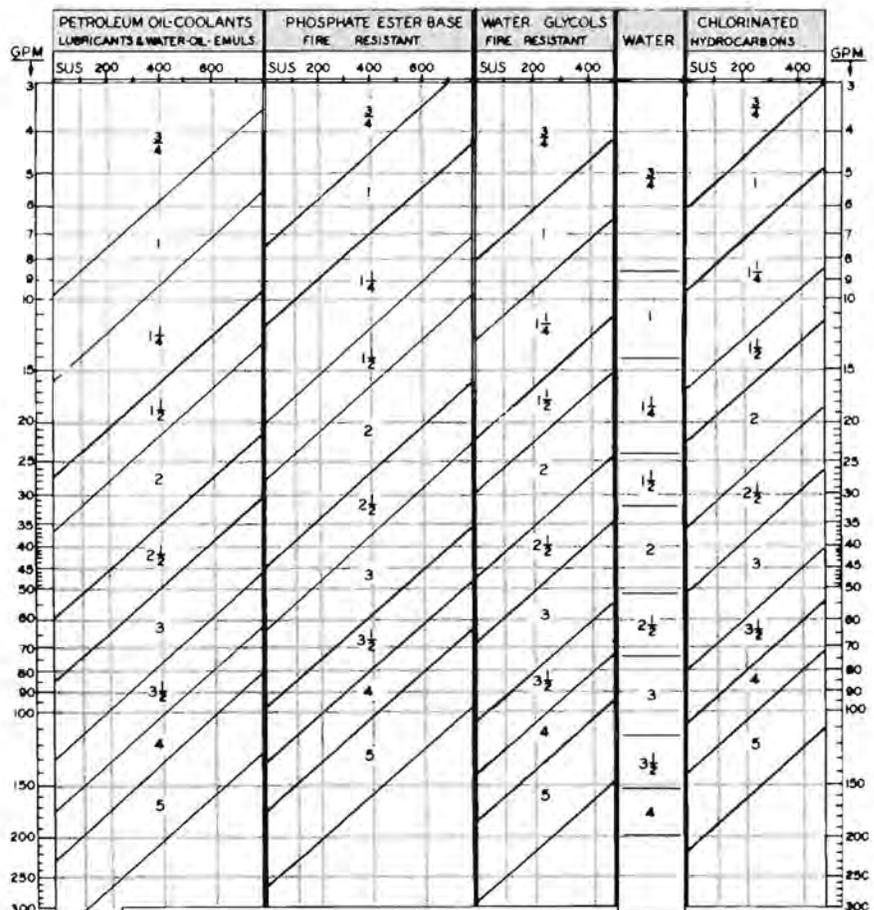

## SUCTION FILTER SIZE SELECTOR CHART FOR MARVELBO-S FILTERS

EXAMPLE: Nominal Suction Port size for 20 GPM Petroleum Oil, 150 SUS at 100°F. is 1¼"

SUS DESIGNATES SAYBOLT UNIVERSAL SECONDS at 100°F. Chart based on specific gravities shown in table below. For lower specific gravities recommendations can be increased slightly. For higher specific gravities recommendations should be decreased slightly.

### APPROXIMATE SPECIFIC GRAVITIES

| FLUID                   | 100°F | 150°F |
|-------------------------|-------|-------|
| PETROLEUM OIL           | 819   | 762   |
| WATER-OIL EMULSION      | 904   | 877   |
| WATER                   | 990   | 980   |
| WATER-GLYCOL            | 1036  | 1018  |
| PHOSPHATE ESTER BASE    | 1190  | 1165  |
| CHLORINATED HYDROCARBON | 1.427 | 1398  |

This chart based upon 0.5 psi max. pressure drop with 200 mesh and coarser elements when filter is clean. For availability of 4" and larger sizes, consult Marvel Engineering Co.

CAUTION. Because Marvelbo-S Filters have such large filtration areas and low pressure drop, selecting filters on the basis of twice the maximum GPM

is absolutely unnecessary and strongly discouraged. Such oversizing increases filter cost and aggravates air release in filter housing, which is especially harmful with variable displacement pumps. Because they help eliminate large air pockets entering the pump, Marvoir Diffusers should be specified for all variable displacement pumps (see under "Optional Equipment", page 4).

# Marvelbo-S Suction Filter with Superior Advantages

## Colorator Indicating, Dual Filtration, Easy Installation and Servicing!

- A** Color-Coded Colorator Indicator
- B** Wire Mesh Sleeve Filter
- C** Marvel Synclinal Filter Element
- D** Maximum Port Sizes

The Marvelbo-S Suction Filter with Colorator Indicator, (A) in cut-away at left, has other outstanding advantages. Its Dual Filtration feature provides superior filtering with longer element life. Initial filtration is performed by the large coarse wire mesh cylindrical sleeve (B). Within this sleeve is the fine Marvel Synclinal element (C). Other available filter element media are shown in Table II, page 4. The Sleeve Filter—easily cleaned for servicing—extends the service life of the fine Synclinal element.

The Marvelbo-S can be installed in place of the elbow that normally leads into the pump intake. Because the Filter is installed outside the reservoir, it is always readily accessible for servicing. Other advantages are:

- Element replacement in less than 90 seconds—without disturbing any piping.
- Symmetrical coaxial design makes it impossible to reassemble filter element incorrectly.
- No internal moving parts (except when by-pass opens).
- No internal springs to obstruct flow path or damage pump.
- Elements are interchangeable with those of other Marvel Colorator Filters.
- Wide selection of port options, element media.
- Built to Marvel's high quality standards.
- Lightweight and low cost.
- Available with MarvelMag Magnetic Shield (optional) for greatly enhanced filtering efficiency and protection against ferric particles.
- Marvair\*-Diffuser (optional) diffuses trapped air in filter to small bubbles, helping assure quiet pump operation and eliminating possibility of large air pocket entering pump. See page 4 for recommended usage.
- Warning Switch-Options. (See below)

## MARVEL ELECTRIC WARNING SWITCH

- Provides electric signal for operating light or alarm.
- Switch and conduit not disturbed when servicing filter.
- Colorator Indicator remains clearly readable with system operating or shut down.
- Switch mechanism tamperproof—fully protected by sturdy, steel guard.
- Permits filter servicing as quickly as on standard filters—in less than 90 seconds.
- Switch setting not disturbed when servicing filter.
- Maximum speed, safety, and convenience in making switch connections and disconnections when servicing (Installation of filter cover automatically engages switch mechanism.
- Choice of Left Hand (LH) or Right Hand (RH) switch locations.
- Switch is BZE 6-2RN Micro-Switch factory set to automatically activate light or alarm when Colorator Indicator enters Red band (when filter is by-passing oil).

The By-Pass Code No. for the Warning Switch illustrated is "0202" for a 2 psi By-Pass and "0302" for a 3 psi By-Pass. With Switch located 180° from that shown, the Code No. is "0203" for a 2 psi By-Pass and "0303" for a 3 psi By-Pass. See next page on how to specify.

## OPTIONAL EQUIPMENT

**ELECTRIC WARNING SWITCH.** For operating warning light or alarm. Described and illustrated on page 3.

**TO SPECIFY WITH SWITCH LOCATED AS ILLUSTRATED ON PAGE 3...**

Example: For Switch with 2 psi By-Pass, Housing No. "801161-0200" becomes "801161-0202". For Switch with 3 psi By-Pass, Housing No. becomes "801161-0302".

**TO SPECIFY WITH SWITCH LOCATED 180° FROM THAT ILLUSTRATED ON PAGE 3...**

Example: For Switch with 2 psi By-Pass, Housing No. "801161-0200" becomes "801161-0203". For Switch with 3 psi By-Pass, Housing No. becomes "801161-0303".

**MARVAIR DIFFUSER.** Use with pumps sensitive to cavitation caused by large air bubbles that often form in suction filters. And use with all variable displacement pumps, which promote the formation of large air bubbles because the filter is oversized at low pump flow rates until full volume output is attained.

The air bubbles are broken up by the Diffuser into tiny bubbles that are quickly and harmlessly dispelled through the pump. To order a Marvaair Diffuser, replace the dash (-) in the Housing Number with a "D". Example: "801161-0200" becomes "801161D0200".

**SEALED DUST COVERS.** Protective, transparent dust covers for Colorator Indicators are provided by Marvel at no extra cost. The Sealed Covers are optional (at no extra cost) on Marvelbo-S and Marvel R Filters. When Sealed Covers are supplied, the Colorator Indicator Ring (Item 14) is omitted to accommodate the Sealed Cover Installation. To specify the Sealed Cover, merely replace the dash (-) in the Housing Number with an "E". Example: "801161-0200" becomes "801161E0200".

**OVERSIZE INLET PORT** (One size larger than standard) is available at nominal cost on Marvelbo-S Filters in both pipe-thread and straight thread port models. To specify, change 3rd digit from left in Group A Housing Numbers (Col. 4) to a "3". Example: "801201-0200" (pipe thread housing) becomes "803201-0200"; and "801202-0200" (straight thread housing) becomes "803202-0200". In the Group B Housing Numbers (Col. 6), to specify the oversize inlet port, change the 3rd digit to a "4". Example: "802481-0200" becomes "804481-0200".

†FOR 3 PSI BY-PASS CHANGE -0200 IN HOUSING NUMBER (COL. 4 OR 6) TO -0300

\*INSERT FILTER ELEMENT MEDIA NUMBER (SEE TABLE II)

| Num-ber | Nom. Micron | Filter Element Media     |
|---------|-------------|--------------------------|
| 1220    | 74          | 200 Mesh Stainless Steel |
| 1215    | 105         | 150 Mesh Stainless Steel |
| 1210    | 141         | 100 Mesh Stainless Steel |
| 1208    | 180         | 80 Mesh Stainless Steel  |
| 1206    | 262         | 60 Mesh Stainless Steel  |
| 1205    | 308         | 50 Mesh Stainless Steel  |
| 1204    | 385         | 40 Mesh Stainless Steel  |
| 1203    | 546         | 30 Mesh Stainless Steel  |
| 1202    | 546         | 20 Mesh Stainless Steel  |

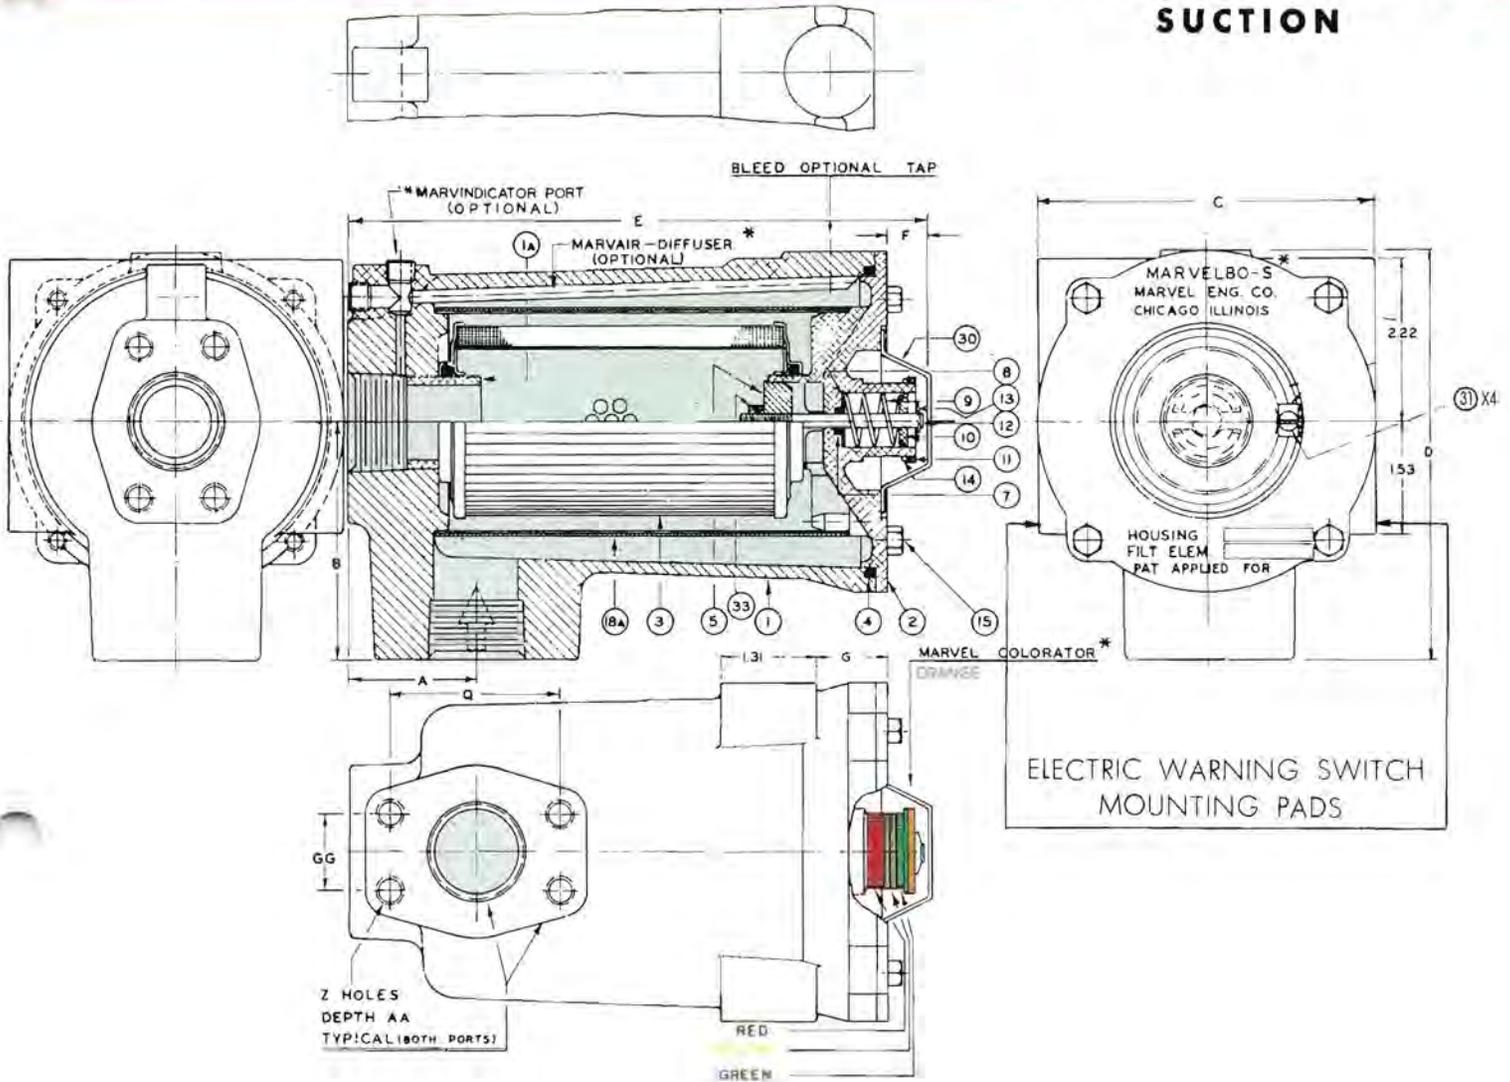

## SELECTING AND ORDERING

Here's the simple method of making your selection and properly specifying it on your order, through use of our Filter Numbering Code...

- Housing Number and By-Pass Code** for fluid to be filtered, from Table 1, Col. 4 or 6. (By-Pass Code is 4-digit number after dash in Housing No.).
- Filter Element Number** for fluid selected, from Table 1, Col. 5 or 7.
- Filter Element Media Number** for desired degree of filtration, from Table II.

**EXAMPLE:** A Marvelbo-S, 3-8 NPTF Port, 2 psi By-Pass Suction Filter for Hydraulic Oil, 200 Mesh Stainless Steel... is specified by the following:

## SUCTION

\*Trade names, Marvel Engineering Co.

| (a)<br>Housing No. | (b)<br>By-Pass No. | (c)<br>Element No. | Media No. |
|--------------------|--------------------|--------------------|-----------|
| 801481-0200        |                    | 686566-1220        |           |

△ Change Dash to "E" for Epoxy Sealed Cover or to "D" for Marvail Diffuser.

Change Dash to "M" for MarvelMag

△ If both "D" and "E" are desired, insert them in alphabetical order.  
 Example: 801481DE0200

To specify a MarvelMag Magnetic Element, insert "M" in place of dash shown above between Element No. and Media No. making the combined number "686566M1220". To order a replacement Filter Element only, specify combined Element-Media No. only.

## MARVELBO-R COLORATOR INDICATING FILTERS

For BY-PASS options, see Table II

For FILTER ELEMENT MEDIA options, see Table III

The Marvelbo-R Filter with Colorator Indicator is ideal for all types of filtering applications in all pressure ranges up to 250 psi, where convenient elbow type porting is desired. Its availability with MarvelMag Magnetic Shield (optional) offers greatly enhanced filtering efficiency and protection against ferric particles. Port sizes and types cover a wide latitude of installations. Other advantages are:

- Economical price
- Minimum weight
- Wide choice of By-Pass settings and filtering media
- Dimensionally Interchangeable with the 90° Outlet R2 and R5 Filters
- Interchangeability of filter elements with other Marvel Indicating Filters
- Element replacement and/or servicing without disturbing piping
- Built to high quality Marvel specifications
- Warning Switch Options

Self-bleeding (no air pockets) when mounted as shown. For filter sizing, see page 8.

Note: Epoxy Sealed Transparent Dust Cover over Colorator Indicator is a no-extra-cost option. To specify, merely replace dash (-) in Housing Number (Cols. 3 & 5 below) with an "E". Example: "851161-" becomes "851161E".

\*\* Mesh reinforcement recommended for shock return lines, for pressure installations where by-pass valve does not open, or for momentary reverse flow pressure applications.

**SELECTING AND ORDERING.** Here's the simple method of making your selection and properly specifying it on your order, through use of our Filter Number Code:

- Housing Number for fluid to be filtered. Select from Table I, Column 3 or 5.
- By-Pass Number, from Table II.
- Filter Element Number for fluid selected, from Table I, Column 4 or 6.
- Filter Element Media Number for desired degree of filtration, from Table III.

**EXAMPLE:** A Marvelbo-R 1½-12 SAE Straight Thread Elbow Type Filter for Hydraulic Oils, 5 psi By-Pass, 200 Mesh Stainless Steel Element ... is specified by the following:

To specify a MarvelMag Magnetic Element, simply insert "M" in place of dash shown above between Element No. and Media No. making the combined number "664266M1220". To order a replacement Filter Element only, specify combined Element-Media Number only.

**851161-thru 852322-**

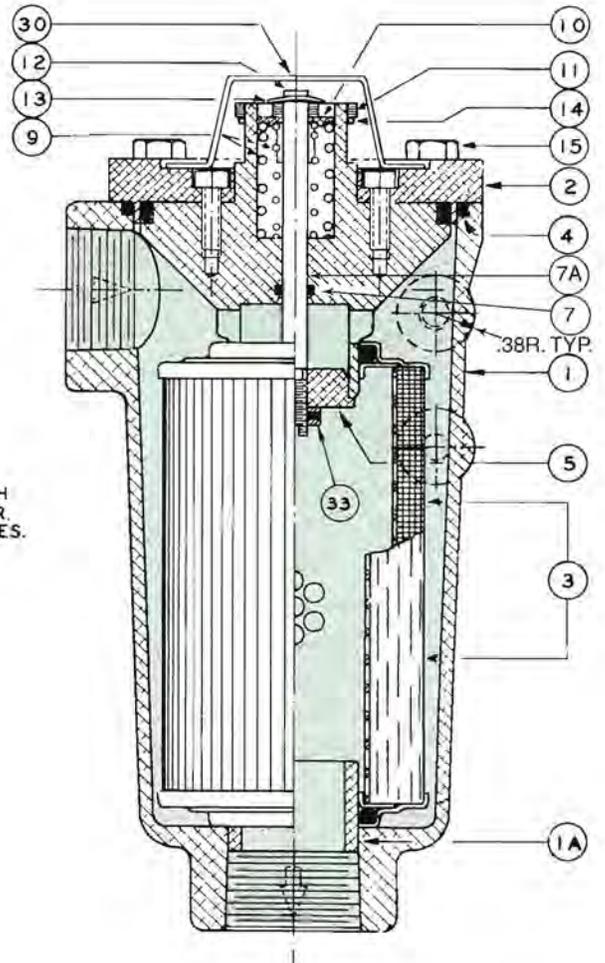

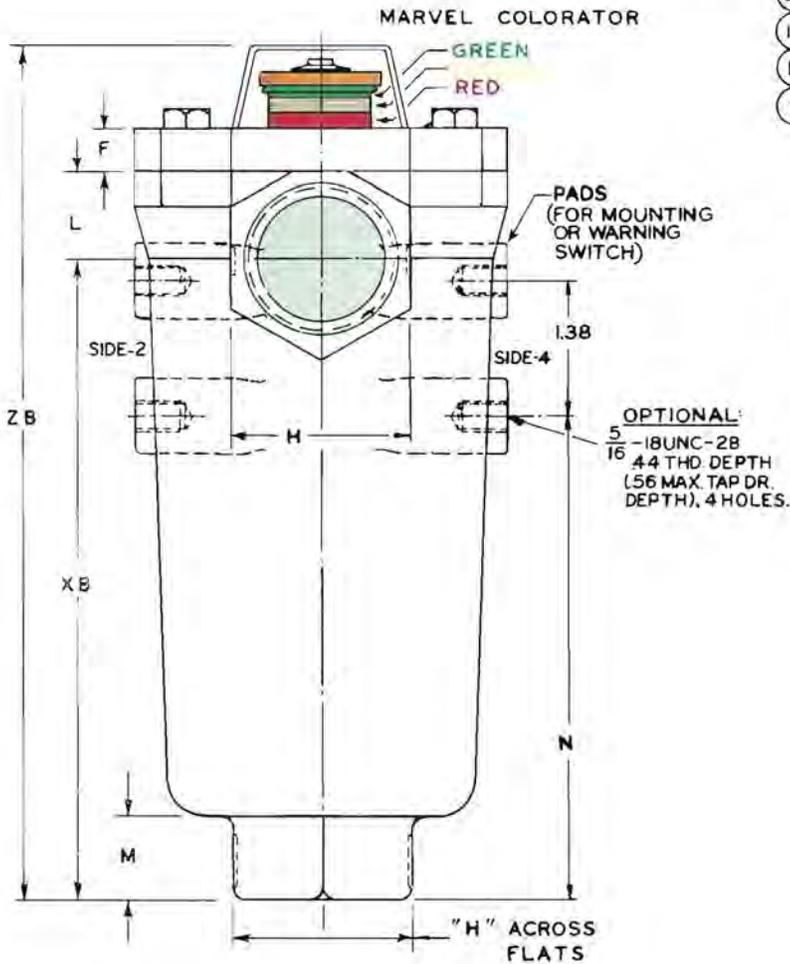

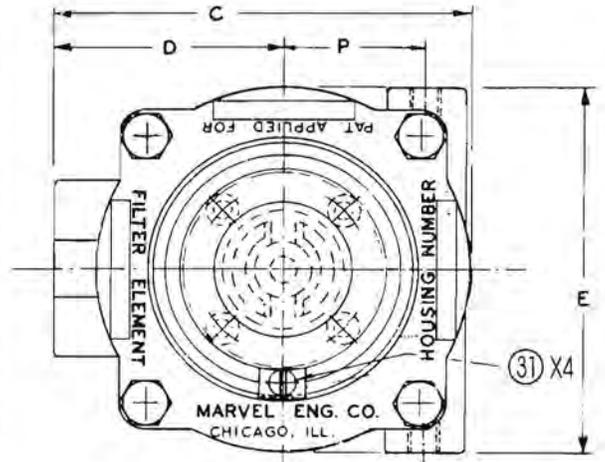

**250 psi (Max.)      500 psi (Max.)**  
**General Service    Non-Shock Service**  
 1,000 PSI Min. Burst @ 70°F

"Marvelbo-R Filters also available in non-indicating construction or with Electric Warning Switch. Consult Marvel for details."

Patents Applied For

MEASURE and RETURN FILTER SIZE SELECTION CHART FOR SINGLE ELEMENT

EXAMPLE: Nominal Pressure Port Size for Single Element, 74-Micron (200 Mesh), 75 GPM Petroleum Oil, 250 SUS at 100°F. is 1½".

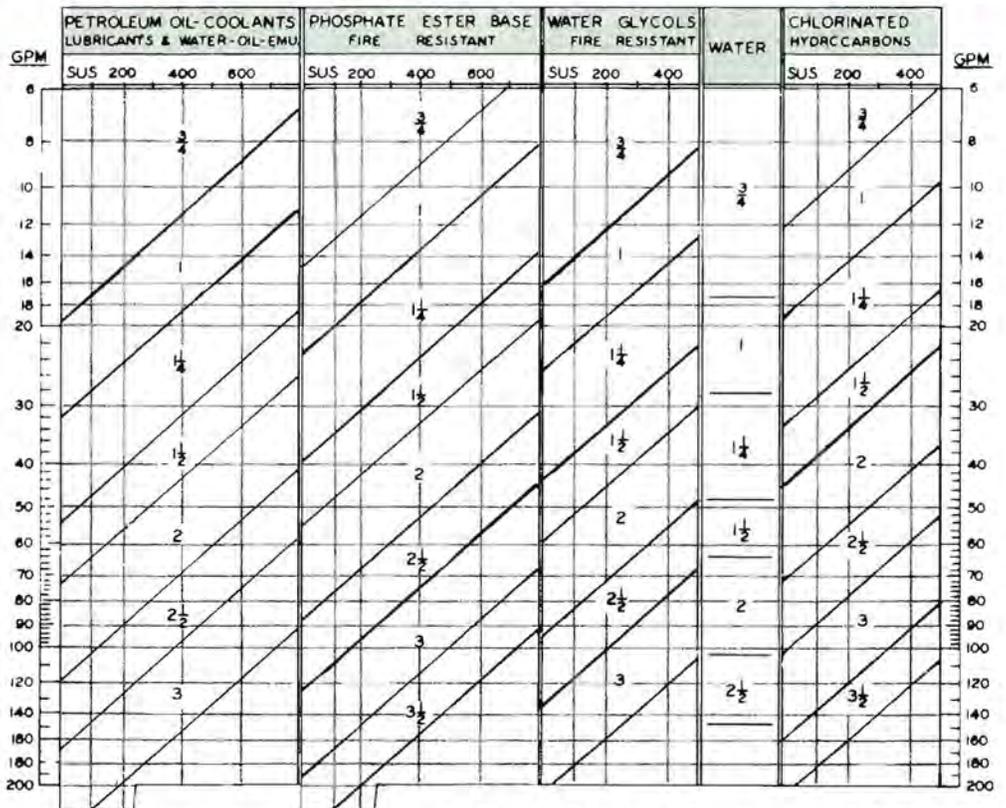

For availability of 2½" and larger sizes, consult Marvel Engineering Co.

MEASURE and RETURN FILTER SIZE SELECTION CHART FOR DOUBLE ELEMENT

EXAMPLE: Nominal Pressure Port Size for Double Element, 10-Micron, 30 GPM. Phosphate Ester, 150 SUS at 100°F. is 1¼".

On 10-Micron Filters, three elements should be used wherever space permits. The small additional cost will reduce frequency of element change and initial pressure drop.

For selecting 3-25 Micron Single Element Marvelbo-R Filters from this Double Element Chart, simply size the filter on the basis of double your GPM requirements. Example: For 30 GPM applications, size the Single Element Marvelbo-R Filter for 60 GPM.

For availability of 2½" and larger sizes, consult Marvel Engineering Co.

Ask for our Free Marvel Filtersizer Slide Rule that, in one quick setting, gives filter size for any GPM, viscosity, and degree of filtration.

in One Great New Filter...**

# MARVEL "R2" or "R5"\* Colorator Indicating HEAVY DUTY HYDRAULIC FILTER

**R2 SERIES** up to 2000 PSI (Max.) General Service  
up to 3000 PSI (Max.) Non-Shock Service  
6,000 PSI Min. Burst @ 70°F

**R5 SERIES** up to 3000 PSI (Max.) General Service  
up to 5000 PSI (Max.) Non-Shock Service  
10,000 PSI Min. Burst @ 70°F

**ADDED PROTECTION**

from (optional) Electric Warning Switch. Switch and wiring not disturbed when changing elements.

**SELF PURGING**  
Natural flow path eliminates air pockets that reduce filtration efficiency.

**MINIMUM PRESSURE DROP**  
assured by smooth generous Entry Chamber.

**QUICKEST, EASIEST SERVICING**  
Elements and Cover removed simultaneously for cleaning or replacement—and without having to drain filter. Colorator and By-Pass Assembly not disturbed when servicing element and cannot be reinstalled incorrectly.

**"STANDARDIZED" COMPONENTS**  
save time, money, stock space. R2 and R5 have interchangeable mounting and envelope dimensions in given porting and size—and interchangeable elements which are even interchangeable in all other Marvel Indicating Filters.

**HEAVY DUTY WELDED STEEL**  
construction. External welds only—provide smooth, inner surfaces.

**CONVENIENT MOUNTING HOLES**  
eliminate strain on piping.

**FAST, PROPER INSTALLATION AND SEATING**  
of element assured by Element Guide.

**NEW, BETTER PROTECTION**  
from unique Colorator Indicator. Safeguards entire system. Uses three vibrant colors that "shout out" exact condition of elements at all times.

**VASTLY IMPROVED FILTRATION**  
from instantly cleanable "Lay-In, Lift-Out" MarvelMag Magnetic Rods (optional). Provide complete outer magnetic shield that traps all ferro-magnetic contaminants BEFORE they can clog element. "Colorator" indicates condition of both elements and MarvelMag Magnetic Rods.

**FINEST FILTRATION**  
(down to 5 microns) with Single or Multiple Elements (paper or wire cloth).

**VERSATILE PORTING**  
Reverse Outlet Flow (illustrated at left), available in: a. Threaded Parts b. "O" Ring Parts (Subplate) c. SAE 4-Bolt

2. 180° Outlet—Threaded or SAE 4-Bolt      3. 90° Outlet—Threaded or SAE 4-Bolt

Patents Pending

Use Marvel R2 and R5 Colorator Indicating Filters for those tough high pressure filtering jobs. They feature the rugged construction, precision engineering, and finest quality components essential in high pressure systems where fine filtration is required for long periods without maintenance or downtime. Other outstanding features are:

- Minimum weight and envelope dimensions
- Extremely versatile selection of port options
- Interchangeability of filter elements with other Marvel Indicating Filters
- Element replacement and/or servicing without disturbing piping
- Available, at customers' option, with Warning Switch—and MarvelMag Magnetic Shield that greatly enhances filtering efficiency and element life.

Note: For complete cross-section construction details of R2 and R5 Filters, see pages 11, 13, 15 and 17.

\*\* Mesh reinforcement recommended for shock return lines, for pressure installations where by-pass valve does not open, or for momentary reverse flow pressure applications.

**SELECTING AND ORDERING.** Here's the simple method of making your selection and properly specifying it on your order, through use of our Filter Number Code:

- Housing Number (Single or Double Element) for fluid to be filtered. Select from Table I or Table II, Columns 4 and 5, Group A, or Columns 7 and 8, Group B.
- By-Pass and/or Warning Switch Number, from Table III.
- Filter Element Number for fluid selected, from Table I or Table II, Columns 6 and 9.
- Filter Element Media Number for desired degree of filtration, from Table IV.

**R2 and R5 SINGLE ELEMENT and DOUBLE ELEMENT**

EXAMPLE: A Marvel R2, Reverse Outlet, 1 1/2" NPT Double Element Filter for Phosphate Ester Base Fluid, 25 psi By-Pass, LH Warning Switch on Side 2 (See Page 19), 200 Mesh mesh filter element . . . is specified by the following:

|                                  |             |             |           |
|----------------------------------|-------------|-------------|-----------|
| (a)                              | (b)         | (c)         | (d)       |
| Housing No.                      | By-Pass No. | Element No. | Media No. |
| 817241-2501                      |             | 669306-1220 |           |
| Change Dash to "M" for MarvelMag |             |             |           |

To specify a MarvelMag Magnetic Element, simply insert "M" in place of dash shown above between Element No. and Media No. making the combined number "669306M1220". To order a replacement Filter Element only, specify combined Element-Media Number only.

Cover Design "A1" shown in R2 sectional view. Cover Design "A2" shown in R5 sectional view. Marvel Engineering Co. reserves the right to phase out Cover Design "A1" and furnish "A2". Name Plate will indicate "A1" or "A2".

Table IV—Filter Element Media Numbers

| Number | Nom. Micron | Filter Element Media         |
|--------|-------------|------------------------------|
| 1220   | 74          | 200 Mesh Stainless Steel     |
| 1215   | 105         | 150 Mesh Stainless Steel     |
| 1210   | 141         | 100 Mesh Stainless Steel     |
| 1208   | 180         | 80 Mesh Stainless Steel      |
| 1206   | 262         | 60 Mesh Stainless Steel      |
| 1205   | 308         | 50 Mesh Stainless Steel      |
| 1204   | 385         | 40 Mesh Stainless Steel      |
| 1203   | 546         | 30 Mesh Stainless Steel      |
| 1202   | 914         | 20 Mesh Stainless Steel      |
| 2210   | 10          | 8-10 Micron Stainless Steel  |
| 2215   | 15          | 10-15 Micron Stainless Steel |
| 2225   | 25          | 25 Micron Stainless Steel    |
| 2240   | 40          | 40 Micron Stainless Steel    |
| 7103   | 3           | 3 Micron Paper               |
| 7110   | 10          | 10 Micron Paper              |
| 7120   | 20          | 20 Micron Paper              |
| 7203** | 3           | 3 Micron Paper Mesh Inside   |
| 7210** | 10          | 10 Micron Paper Mesh Inside  |
| 7220** | 20          | 20 Micron Paper Mesh Inside  |
| 7303** | 3           | 3 Micron Paper Mesh Outside  |
| 7310** | 10          | 10 Micron Paper Mesh Outside |
| 7320** | 20          | 20 Micron Paper Mesh Outside |

\*\* Mesh reinforcement recommended for shock return lines, for pressure installations where by-pass valve does not open, or for momentary reverse flow pressure applications.

**SELECTING AND ORDERING.** Here's the simple method of making your selection and properly specifying it on your order, through use of our Filter Number Code:

- Housing Number (Single or Double Element) for fluid to be filtered. Select from Table I or Table II, Columns 4 and 5, Group A, or Columns 7 and 8, Group B.
- By-Pass and/or Warning Switch Number, from Table III.
- Filter Element Number for fluid selected, from Table I or Table II, Columns 6 and 9.
- Filter Element Media Number for desired degree of filtration, from Table IV.

**R5 DOUBLE ELEMENT**

EXAMPLE: A Marvel R5, 180° outlet, 1-5/16"-12 SAE, Single Element Filter for Hydraulic Oils, 15 psi By-Pass, 15 micron stainless steel . . . is specified by the following

|                 |                 |                 |               |
|-----------------|-----------------|-----------------|---------------|
| (a) Housing No. | (b) By-Pass No. | (c) Element No. | (d) Media No. |
| 841162-1500     |                 | 629206-2215     |               |

Change Dash to "M" for MarvelMag

To specify a MarvelMag Magnetic Element, simply Insert "M" in place of dash shown above between Element No. and Media No. making the combined number "629206M2215". To order a replacement Filter Element only, specify combined Element-Media Number only.

Cover Design "A1" shown in R2 sectional view. Cover Design "A2" shown in R5 sectional view. Marvel Engineering Co. reserves the right to phase out Cover Design "A1" and furnish "A2". Name Plate will indicate "A1" or "A2".

For FILTER ELEMENT MEDIA options, see Table IV  
For WARNING SWITCH MOUNTING, see Page 19

TABLE III — R2 & R5 BY-PASS

| SWITCH |      | BY-PASS  |      |        |        |        |
|--------|------|----------|------|--------|--------|--------|
| Type   | Side | LH or RH | None | 10 psi | 15 psi | 25 psi |
| 0      | 0    | 0        | 0000 | 1000   | 1500   | 2500   |
| 1      | 2    | LH       | 0001 | 1001   | 1501   | 2501   |
| 1      | 2    | RH       | 0002 | 1002   | 1502   | 2502   |
| 1      | 4    | LH       | 0003 | 1003   | 1503   | 2503   |
| 1      | 4    | RH       | 0004 | 1004   | 1504   | 2504   |

TYPE 1—Micro Switch BZE6-2RN.

When no by-pass is specified a 15 psi spring is used in colorator indicator unless otherwise specified.

NOTE: When Filters are provided with Warning Switches, last digit in By-Pass Numbers designate location of Warning Switch installation (1, 2, 3, or 4—see page 19).

\*\* Mesh reinforcement recommended for shock return lines, for pressure installations where by-pass valve does not open, or for momentary reverse flow pressure applications.

SELECTING AND ORDERING. Here's the simple method of making your selection and properly specifying it on your order, through use of our Filter Number Code:

- Housing Number (Single or Double Element) for fluid to be filtered. Select from Table I or Table II, Columns 4 and 5, Group A, or Columns 7 and 8, Group B.
- By-Pass and/or Warning Switch Number, from Table III.
- Filter Element Number for fluid selected, from Table I or Table II, Columns 6 and 9.
- Filter Element Media Number for desired degree of filtration, from Table IV.

EXAMPLE: A Marvel R2, 90° Outlet, 1½" SAE Flange Double Element Filter for Phosphate Ester Base Fluid, No By-Pass "RH" Warning Switch on Side 2 (See Page 19), 10-Micron Stainless Steel Elements . . . is specified by the following:

**R2 and R5 SINGLE ELEMENT and DOUBLE ELEMENT**

(also available in non-indicating design)

Change Dash to "M" for MarvelMag

To specify a MarvelMag Magnetic Element, simply insert "M" in place of dash shown above between Element No. and Media No. making the combined number "669306M2210". To order a replacement Filter Element only, specify combined Element-Media Number only.

TYPE 1—Micro Switch BZE6-2RN.

For switch mountings on 1" Ports R2 and R5 Sub-Plate mounted Filters consult Marvel Engineering Dept. When no by-pass is specified a 15 psi spring is used in colorator indicator unless otherwise specified.

NOTE: When Filters are provided with Warning Switches, last digit in By-Pass Numbers designate location of Warning Switch installation (1, 2, 3, or 4—see page 19).

†SEE TABLE III FOR BY-PASS SETTINGS AND LIMIT SWITCH VARIATIONS

\*INSERT FILTER ELEMENT MEDIA NUMBER (SEE TABLE IV)

**SELECTING AND ORDERING:** Here's the simple method of making your selection and properly specifying it on your order, through use of our Filter Number Code:

- Housing Number (Single or Double Element) for fluid to be filtered. Select from Table I or Table II, Columns 2 and 3, Group A, or Columns 5 and 6, Group B.
- By-Pass and/or Warning Switch Number, from Table III.
- Filter Element Number for fluid selected, from Table I or Table II, Columns 4 and 7.
- Filter Element Media Number for desired degree of filtration, from Table IV.

**EXAMPLE:** A Marvel R5, Sub-Plate Mounted 1.50" Port, Single Element Filter for Coolants, 25 psi By-Pass, "LH" Warning Switch on Side 3, 80 Mesh Stainless Steel Element... is specified by the following:

| (a)<br>Housing No.               | (b)<br>By-Pass No. | (c)<br>Element No. | (d)<br>Media No. |
|----------------------------------|--------------------|--------------------|------------------|
| 891248                           | -2503              | 668306             | -1208            |
| Change Dash to "M" for MarvelMag |                    |                    |                  |

To specify a MarvelMag Magnetic Element, simply insert "M" in place of dash shown above between Element No. and Media No. making the combined number "668306M1208". To order a replacement Filter Element only, specify combined Element-Media Number only.

# Interchangeable Filter Elements

# MARVEL FILTERS

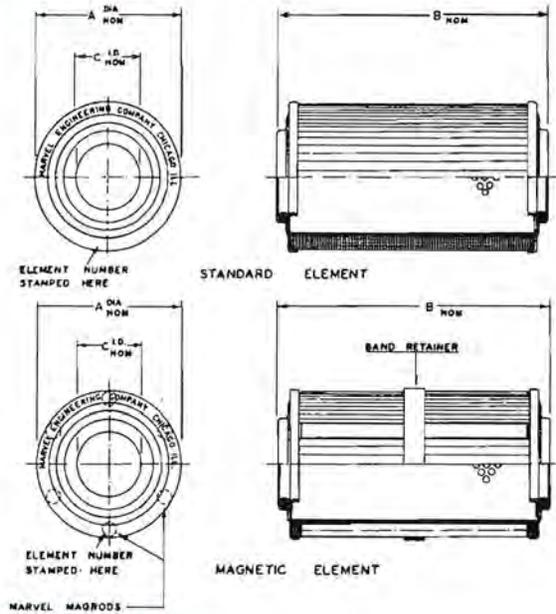

629206- thru 687566-

for MARVELBO-S  
MARVELBO-R  
MARVEL R2 & R5

Interchangeability of the same filter elements in different filter models offers important benefits and savings in the purchase and application of filters. The tables below show how a Marvel Filter Element size of your choice can be used in as many as 16 different combinations of filter model and port size. Obvious advantages are:

- Simplified stocking and inventory
- Easier ordering with less paperwork
- The price savings of quantity purchases for one item as against a variety of small orders for many items
- Elements always available for field replacement

Any Element for Marvel Indicating Filters can be replaced or serviced without disturbing any of the system piping. Note that MarvelMag magnetic elements are interchangeable with the non-magnetic elements.

\*\* Mesh reinforcement recommended for shock return lines, for pressure installations where by-pass valve does not open, or for momentary reverse flow pressure applications.

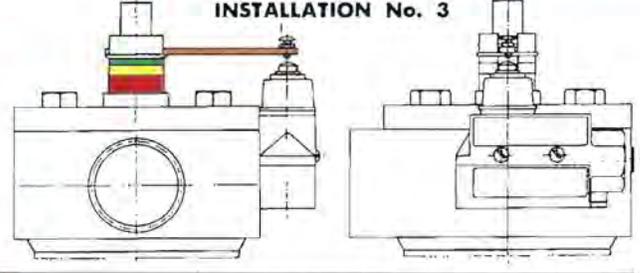

Marvel electric Warning Switches—optional on Marvel R2 and R5 Filters—operate with positive simplicity in conjunction with the Colorator Indicator to provide additional versatility in pinpointing condition of filter element. As Colorator Indicator actuates, it carries Warning Switch trip arm with it, causing it to activate Warning Switch at the precise time desired. Protective, tamper proof, Trip Arm Shield optional.

# MARVEL FILTERS

## \* SYNCLINAL

Two and one half times more active filtering area than equivalent size cylindrical type units . . . Longer operating periods between cleanings . . . No moving parts . . . These features of the Marvel Synclinal Filter have made it industry's top choice for dependable filtering of all types of liquids under the severest operating conditions.

To this, add fast, easy installation, cleaning, and maintenance . . . and it's easy to see why the Marvel

Synclinal Filters shown in these pages offer important savings in downtime, servicing and investment costs in providing maximum protection to all system components.

And it is the Synclinal Design itself which has made it possible for Marvel to offer industry another major advance in filtration as shown below . . . the unique MarvelMag Magnetic Shield, now available, at customer's option.

### new MARVELMAG\* MAGNETIC FILTER SHIELD

*... that completely surrounds and supplements Synclinal\* filter element!*

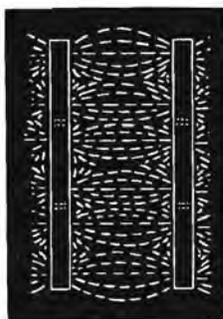

Actual photo showing how large flow areas of element remain free to provide full flow filtration even when magnetic rods are heavily loaded with trapped ferric particles.

Patents Applied For

#### SO EASY TO SERVICE!

"Lay-in . . . Lift-out" Magnetic rods. MarvelMag Shield is formed by individual magnetic rods placed in grooves on outer surface of Synclinal element. To clean rods, just lift out, wipe off, and lay them back in grooves. Slip-on spring clip keeps rods from being magnetically dislodged accidentally.

#### OVERLAPPING MAGNETIC FIELDS

The individual magnetic rods are full filter element length and their unique design provides powerful magnetic fields along entire length of element. The rods are equally spaced around exterior surface of element so that their magnetic fields overlap to cover full element circumference. This provides a complete magnetic shield around the outer (upstream) side of element in the area of lowest fluid velocity—where ferric particles are most effectively trapped and retained and where overall filtering efficiency is at maximum.

MarvelMag Optional on all Marvel Filters in this catalog. It is also available on most other filters in Marvel's Complete Line of Suction, Pressure and Return Line Models.

Better filtration, longer element life, hours saved in servicing . . . with amazing new MarvelMag elements. The harsh, cutting ferric contaminants (that do the most damage to system components) are instantly trapped by complete, outer MarvelMag Magnetic Shield BEFORE they can reach element, keeping it—and entire system—clean, undamaged and functioning at top efficiency for much longer periods without servicing. Ferric particles small enough to pass

through element and on into system are most speedily trapped and retained by the all-encircling magnetic shield. Generous flow areas between magnetic rods remain uncluttered, greatly increasing filter efficiency and life. The magnetic rods do not increase element dimensions, providing complete interchangeability of MarvelMag elements with non-magnetic elements.
